## Career Objective

B.Tech CSE (AI & ML) student passionate about Artificial Intelligence, Cybersecurity, and Web Development. Skilled in Python, C, and modern technologies with hands-on project experience in AI-based applications. Seeking opportunities to apply knowledge in real-world problem-solving and contribute to innovative projects.

## Education

|                      |                         |                      |
|----------------------|-------------------------|----------------------|
| B.Tech CSE (AI & ML) | GLA University, Mathura | 2024–2028 (Pursuing) |
| 12th (PCM)           | Sirsaganj Public School | 75.0% (2023)         |
| 10th                 | Sirsaganj Public School | 87.0% (2021)         |

## Skills

- Programming: Python, C, Java
- Core: Artificial Intelligence, Cybersecurity, Web Development, Machine Learning
- Tools: Git, GitHub, Microsoft Azure
- Soft Skills: Problem-solving, Teamwork, Quick Learner

## Projects

- AI Voice Assistant (Alexa-like) – Developed a Python-based AI assistant with features like Wikipedia search, weather updates, jokes, email sending, and GUI interface.
- Moodify – A mood-based music and motivation app with emotion detection, quotes API, Spotify/YouTube integration, and reminders.
- Healthcare Symptoms Checker Portal – Web-based system where users can input symptoms to get probable disease predictions and preventive measures using ML models.
- EduBot – AI-powered chatbot for education-related queries, providing study material, Q&A, and guidance to students.
- Education Article Generator – Built an NLP-based project that generates well-structured educational articles automatically using AI.
- Email/SMS Spam Classifier – Machine learning project to classify emails/SMS as spam or ham using NLP and feature extraction techniques.

## Certifications

- Microsoft Azure Fundamentals(AZ-900) – Microsoft
- Microsoft AI Azure Fundamentals(AI-900) -- Microsoft
- C Programming – HackerRank

## Achievements

- Built multiple AI-based projects at undergraduate level.
- A Project ON 5G & IoT Smart City Dashboard
- Software Defect Detection Using Machine Learning (XGBoost + SMOTE)

## Hobbies

- Coding & building AI tools
- Ethical hacking and cybersecurity research
- Exploring new technologies
